Abaxton je španska kompanija osnovana 2004. godine koja je posvećena razvoju, proizvodnji i prodaji specijalnih proizvoda za ishranu bilja. Tokom godina su uspeli da razviju katalog proizvoda zasnovan na kvalitetu, uslugama i timu bliskom svojim klijentima koji im je omogućio da ostvare postavljeni cilj: PAMETNA ISHRANA BILJAKA koja podstiče profitabilnost useva.

Abaxton is a Spanish company founded in 2004 devoted to the development, manufacturing and sale, nationally and internationally, of agronutritional specialties. During all these years we have achieved developing a catalogue based on quality, service and a human team close to the customer that has allowed us achieving our target: a SMART VEGETAL NUTRITION that enhances your crops profitability.

AGQ Labs je globalni tehnološki centar specijalizovan za analize, napredno testiranje i specijalizovani hemijski inženjering. Sa više od 30 godina iskustva, pružaju rešenja i usluge u ključnim sektorima, uključujući poljoprivredu, hranu za ljude i životinje, upravljanje životnom sredinom, rudarstvo, prirodne nauke, energetiku i industrijske procese. Udružujući najsavremeniju analitičku tehnologiju sa stručnim tumačenjem i savetodavnim uslugama, pomažu klijentima da unaprede održivost, efikasnost, bezbednost i produktivnost svojih aktivnosti. Kroz međunarodnu mrežu akreditovanih laboratorija i tehničkih centara, AGQ Labs pruža pouzdane, inovativne usluge koje se prilagođavaju najzahtevnijim zakonskim regulativama i standardima kvaliteta u svetu.

AGQ Labs is a global technological centre specializing in analytical laboratories, advanced testing, and specialised chemical engineering. With over 30 years of experience, they deliver high-value solutions and services across key sectors including agriculture, food and feed, environmental management, mining, life sciences, energy, and industrial processes. Combining cutting-edge analytical technology with expert interpretation and consultancy, they help clients enhance sustainability, efficiency, safety, and productivity in their operations. Supported by an international network of accredited labs and technical centres, AGQ Labs provides reliable, innovative, and tailored services that meet the most demanding regulatory and quality standards worldwide.

Digitanimal je globalni lider u GPS lokalizaciji i praćenju stoke koji aktivno učestvuje u transformaciji stočarstva od 2015. godine. Njihovi inovativni IoT proizvodi su zasnovani na rešenjima koja omogućavaju farmerima da prate lokaciju životinja, vitalne parametre, aktivnost i težinu u realnom vremenu. Njihove GPS ogrlice na solarno punjenje, pametne vage i platforma za upravljanje podacima podstiču produktivnost, poboljšavaju dobrobit životinja i optimizuju upotrebu resursa. Uz prisustvo u preko 80 zemalja i saradnju sa više od 12.000 klijenata, Digitanimal donosi budućnost u stočarski sektor kroz sledljivost, održivost i primenjive informacije - od farme do stola.

Digitanimal is a global leader in livestock localization and monitoring, driving the digital transformation of farming since 2015. They deliver innovative IoT-based solutions that enable farmers to monitor animal location, health, activity, and weight in real time. Their solar-powered GPS collars, smart scales, and data-driven management platform enhance productivity, improve animal welfare, and optimize resource use. Present in more than 80 countries and serving over 12,000 clients, Digitanimal connects farms to the future through traceability, sustainability, and actionable intelligence—from farm to table.

Hidroconta je proizvođač specijalizovanih mehaničkih i digitalnih vodomera, hidrauličnih ventila i IoT terminala. Njihova oprema je dizajnirana za urbane mreže i sisteme navodnjavanja, omogućavajući beleženje podataka i automatizaciju. Fokusraju se na isporuku robusne opreme za precizno merenje i kontrolu operativnog toka. Njihova rešenja garantuju tehničku pouzdanost za upravljanje međunarodnom vodnom infrastrukturom.

Manufacturer of water technology, providing a specialized range of mechanical and digital meters, hydraulic valves, and IoT terminals. Their equipment is designed for irrigation and urban networks, facilitating data capture and automation. They focus on delivering robust hardware for precise measurement and operational flow control. Their solutions ensure technical reliability for international water infrastructure management.
